Anticline Resources plc

Sustainability report 2025

Environmental, social and governance performance for FY2025, prepared with reference to the group's published 2030 targets.

Climate and energy

Scope 1 and 2 emissions intensity was 0.39 tCO2e per tonne of copper equivalent (2024: 0.42). Renewable electricity reached 41% of supply. The 2030 target remains 0.28 tCO2e per tonne and a 70% renewable share.

Water

Freshwater withdrawal per tonne of ore processed was 0.48 m³ (2024: 0.52). Site water balances were externally reviewed for all five operations.

Safety

The total recordable injury frequency rate was 1.6 per million hours (2024: 1.9). Critical-control verifications covered the eight highest-risk activities at every site.

Land and communities

Cumulative rehabilitation reached 712 hectares against the 1,500-hectare commitment for 2030. Community investment totalled US$16.8m, and 71% of the workforce was recruited locally.
